Our Three-Step High Performance Streets Process

We don't like plans or reports that sit on the shelf. Our three-step process breaks down complex, multi-stakeholder corridor revitalization projects into a clear roadmap towards tangible results. We'll be with you from the first visioning meeting until the last tree is planted and the sidewalk is swept.

Step 1
Capital Plan

Step 2
Schematics

Step 3
Implementation

HIGH PERFORMANCE STREETS

*Making up over **30%** of a town's public space,
streets should do much more than just move vehicles.*

Rethinking the Right-of-Way and Using Location Analytics to Plan for a Post-Pandemic Economic Recovery

May 18, 2022

About DVRPC

- Federally-designated MPO for 9-county Philadelphia region in PA and NJ
- Created in 1965 to plan for the orderly growth and development of the bi-state region.
- Guided by an 18-member Board
- Conduct short, medium, and long term plans
- Provide funding for projects around transportation, land use, economic development, equity, open space, housing, etc.

2020 Retail District Inventory

Retail Mix:

41%
Food & Beverage (FB)

39%

Location Analytics

2020: DVRPC purchased geolocated, deidentified cell phone data, and analyzed that data across five different time periods for all 75 of the retail districts included in the inventory.

- 1** Pre-Pandemic
(Aug 1, 2018 - Mar 12, 2020)
- 2** One Year Prior to Shutdown
(Mar 13 - Jun 15, 2019)
- 3** Shutdown
(Mar 13 - Jun 15, 2020)
- 4** One Year Prior to Reopening
(Jun 16 - Oct 31, 2019)
- 5** Reopening
(Jun 16 - Oct 31, 2020)

Sources: DVRPC and Buxton Co.

Retail Inventory & Location Data Cross Analysis

As the Diversity Score (DS) increased, the Pandemic Impact Score (PIS) decreased.

2022 Updated Findings

Don't put all of your eggs in one basket.

Diversity was consistently the number one attribute related to a lower pandemic impact.

Image Source: Getty Images.

2022 Updated Findings

Size does matter.

Bigger, more urban downtowns, those with larger residential and employment populations, as well as the total number of uses—civic, cultural, office, retail, and residential—were generally more resilient during the pandemic than smaller downtowns.

Image Source: Getty Images.

2022 Updated Findings

Those boots ARE made for walking.

More walkable downtowns, those with fewer vehicles per household and higher WalkScores, were less impacted over the course of the pandemic.

Image Source: Getty Images.

2022 Updated Findings

People are social butterflies.

As the share of food and beverage uses (including craft breweries, distilleries, and wineries) went up in a downtown, the pandemic impact went down.

Image Source: Getty Images.

2022 Updated Findings

A little retail therapy goes a long way.

As the number of retail uses, and retail's share of all uses, increased in a downtown, the pandemic's impact decreased.

Image Source: Getty Images.

2022 Updated Findings

E-Commerce and Downtowns: A Match Made in Heaven.

During the pandemic, downtowns where retail establishments had a greater digital presence (e.g. websites and/or social media accounts) were less impacted.

Image Source: Getty Images.

2022 Updated Findings

Different people make the world go round.

Greater demographic diversity was linked with a lower overall pandemic impact.

Image Source: Getty Images.

2022 Updated Findings

Transit goes both ways.

During periods of high case counts, transit-oriented downtowns were less-impacted.

Conversely, these downtowns observed less of a rebound during periods of lower case counts and increased mobility.

Image Source: Getty Images.

2022 Updated Findings

Vacancy begat vacancy.

High vacancy rates exacerbated the pandemic's impact.

Image Source: Getty Images.
